Tips for using DVD to QuickTime converter

Tip 1: How to trim the video to convert a certain segment?

1. Choose the title or chapter of the DVD that contains the segment you want, and click the "Trim" button to open the "Video Trim" window.

2. In the "Video Trim" window, click the "Play" button to preview the video, then you can specify the very start position by clicking the "Set Begin" button and end position by clicking the "Set End" button. And if you do not satisfy with the position you set, just click the "Reset" to set the position again.
