

How to rip DVD movie to MP4

Now you can freely enjoy classic DVD movies on various portable devices like iPod, iPhone, iPhone 3G S, once own the powerful [DVD ripper software](#).

Follow the 1-2-3 steps, you will find the conversion from ripping DVD movie to mp4 is so easy and fast.

1. [Download Xilisoft DVD Ripper](#) and install it to your PC. Then load your loved DVD disc from targeted drive.

2. After loading the DVD movie, you can rip DVD with three main modes.

One is title mode (ripping the whole DVD to one file), one is segment mode (ripping video clips), the other is chapter mode.

If you rip in chapter mode, you will get a file for every chapter. When the list box displays the titles not chapters you can convert the whole DVD into one file.

If you'd like to extract video clips, just set 'Start Time' and 'Duration' to rip the segment.

3. Choose "MP4" video format from the video format list, and click the red button to start the DVD to MP4 conversion.

That's all! Why not have a try? More information you can visit: [DVD to MP4 conversion](#).
