

How to put DVD on iPod?

This document will show you how to put DVD on iPod using Xilisoft DVD to iPod Converter, a professional conversion tool for both iPod video and audio.

1. Load DVD movie

[Download Xilisoft DVD to iPod Converter](#) and run it. Load your DVD by choosing "Add DVD Folder" in the 'File' menu or directly pressing the "DVD" button in the main interface, then select your DVD Drive in the pop-up window and press the "OK" button.

2. Put entire DVD movie on iPod

* If you want to convert the entire file, please follow this way:

1) Set output format:

In "Profile" drop down list box, you may select output format. The software allows setting different output formats according to different files.

Tips: There are 2 optimized settings for iPod video conversion, iPod (60G) MPEG-4 Movie (*.mp4) and iPod (30G) MPEG-4 Movie (*.mp4). Selecting any of them, you will get iPod MP4 formats directly.

2) Set conversion mode (Optional) After selecting certain output format, the right column will show its general standard. Clicking certain settings such as 'Zoom', 'Split', 'Destination' and 'Title' etc, you may set it.

Tips: you can set "Bit Rate" by choosing the rate given, such as "512". And the higher the Bit Rate you choose the better the picture you will get. Certainly, you can keep all the above options default without any change.

3) Start conversion

Finally, selected the chapter you want to convert and start conversion by right-clicking the file name and selecting 'Rip Selected' under the menu.

* If you want to convert just a chapter, here is the way: After your DVD is loaded into the program, please select the file name and click the "Show Chapters" button in the main interface and then you will see all the chapters within this file. Please select the chapter you want to convert and do the same as the above (1), (2) and (3).

3. Put DVD on iPod

And then you will get a file that is ready to be played on your iPod. But how do you put the video files you ripped on iPod? Here is the way:

- 1) Please click 'Open' button after the conversion is completed.
- 2) Find the converted file in the destination folder and pull it to your iTunes.

- 3) Drag the file onto the iPod logo in the iTunes and then release the mouse when "+" appears around the cursor. The file will be transferred to iPod automatically.

Finally, you are able to enjoy your beloved movies on your iPod breezily!
