

How to transfer iPhone 3GS files to PC

There is no doubt that the new released iPhone 3GS is the fastest, most powerful iPhone. In fact, comparing with the iPhone 3G, everything you do on iPhone 3GS is up to 2x faster and more responsive than iPhone 3G. iPhone 3GS features video recording, Voice Control, up to 32GB of storage, and more. Today, [Xilisoft iPhone Transfer](#) is also updated as powerful iPhone 3GS transfer software.

In a word, the iPhone 3GS transfer software can help you freely transfer between PC and iPhone 3GS. And it also enables you to copy iPhone 3GS music and videos to iTunes library

The belowed tips will tell you how to step by step backup iPhone 3GS music/movie from iPhone 3GS to PC.

1. Run Xilisoft iPhone Transfer and connect the iPhone 3GS to PC via USB cable. The software will automatically detect the iPhone 3GS, display all the contents of iPhone 3GS in the left device list and show its device info on the right window.
2. Select the files you want to copy to PC by checking them.
3. Click the "Export checked files to local" button to select the target folder for saving iPhone 3GS files in the dialog that appears, and then start to transfer iPhone 3GS contents to PC.
